

Table of Contents

1. Objectives and Purpose of this Document
2. Approach
3. Technical Strategy Stage 1: Define Existing Conditions
 - 3.1 Wetlands
 - 3.1.1 Watershed-Wide Characterization of Wetlands
 - 3.2 Riparian Corridors
 - 3.2.1 Watershed-Wide Characterization of Riparian Corridors
4. Technical Strategy Stage 2: Functional Assessment
 - 4.1 Wetland and Riparian Function and Stream Order
 - 4.2 Wetland and Riparian Function and Landscape Position
 - 4.3 Wetland and Riparian Function Cover Type
 - 4.4 Additional Field Investigations to Assess Function
5. Technical Strategy Stage 3: Establish Priorities
 - 5.1 Streambank Assessment within the Cayuga Lake Watershed
 - 5.2 Priorities for Wetland Restoration and Protection
 - 5.3 Priorities for Riparian Corridor Restoration
6. Technical Strategy Stage 4: Recommend Solutions
 - 6.1 Preservation of Wetlands and Riparian Corridor
 - 6.2 Restoration of Degraded Wetlands and Riparian Corridors
 - 6.3 Wetland Creation and Other Engineered Systems, Including BMPs
 - 6.4 Regulatory Controls
