

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
Section 1: Development			
<i>Existing Developments</i>			
1-01	Identify retrofit opportunities such as addition of stormwater ponds to older developments or construction of wastewater treatment systems to replace older septic systems		0
1-02	Identify habitat and natural conveyance system restoration opportunities		0
1-03	Establish retention/detention areas		0
1-04	Acquire additional land for locating treatment facilities		0
1-05	Encourage homeowners to place compost piles away from waterbodies and roadways	Practice: 1999-2003 GLOW Composting Education Demonstration Sites set up with informational brochures	2
1-06	Encourage proper use and disposal of lawn and other household chemicals	Practice: 1995, 1999, 2003, 2006 GLOW Region Solid Waste Management Committee, in cooperation with GLOW Region Soil and Water Conservation, Farm Bureau and Cornell Cooperative Extension offices, farm pesticide collection programs; Household Hazardous Waste programs held regularly	2
1-07	Institute turf management practices on golf courses and parks and recreation areas		0
1-08	Undertake storm drain stenciling	Practice: conducted in both watersheds at various points in time; MS4s and stormdrains are relatively limited in rural towns, however	2
1-09	Encourage volunteer programs, such as adopt-a-highways and adopt-a-stream, etc.	Practice: Oatka/Black Creek Watershed Committee, Cornell Cooperative Extension and SWCD have various programs and volunteer efforts geared toward stream and ecosystem stewardship	2
1-10	Include high percentage of indigenous plants in new landscaping on privately-owned properties (excluding arboretums, horticultural gardens, and sites requiring turf grasses)	Practice: SWCD tree and shrub sale, occurs on an annual basis; hardy varieties of native species are provided to the public at low-cost	2
1-11	Encourage water conservation		0

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
1-12	Develop outreach programs targeted at specific problems related to water quality management & resource conservation	Practice: CCE, SWCD and the two watershed groups have been developing several distinct programs regarding water quality, including (but not limited to) septic system outreach, erosion and sediment control workshops, agricultural BMPs, watershed planning and household hazardous waste	2
1-13	Encourage proper control of pet wastes		0
1-14	Encourage continued operation of private storm water runoff control structures		0
1-15	Discourage feeding of waterfowl		0
1-16	Discourage the introduction of exotic aquatic species (Eurasian water milfoil, zebra mussels, water chestnut, loosestrife, hogweed, etc		0
1-17	Encourage continued (periodic) operation and maintenance of private septic disposal systems		0
1-18	Effective and consistent application and enforcement of stormwater regulations & requirements		0
1-19	Require certification of existing on site septic systems for property transfers or building expansions.	Genesee County Sanitary Code: inspections performed when repairs, expansions or alterations take place; inspections performed when property transfers take place or upon request during refinancing	2
1-20	Require entire property (existing as well as proposed) to be included in stormwater analysis/calculation.	Z.O. Section 401. B.6 - Preliminary site plans must include a description of storm drainage facilities.	2
1-21	Use of drainage districts		0
<i>New Development and Substantial Redevelopment</i>			
1-22	Minimize the amount of land disturbed and the duration of disturbance		0
1-23	Preserve natural features and conform substantially with the natural boundaries and alignment of waterbodies	Z.O. Section 690. J - Existing on-site vegetation shall be preserved to the maximum extent possible and no cutting of trees exceeding 4 inches in diameter. [RE: Communication Towers]	1
1-24	Retain and protect trees and other natural vegetation on and near disturbed sites	Z.O. Section 690. J - Existing on-site vegetation shall be preserved to the maximum extent possible and no cutting of trees exceeding 4 inches in diameter. [RE: Communication Towers]	1
1-25	Account for topography and soil type in efforts to minimize erosion potential		0

Town of Stafford
Black and Oatka Watersheds

<i>BMP #</i>	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
1-26	Maintain runoff rates similar to pre-construction levels		0
1-27	Minimize the creation of impervious areas [encourage permeable surface]		0
1-28	Control increased runoff caused by changed surface conditions to minimize the danger of flooding, erosion, sedimentation and pollutants entering waterbodies prior to, during and after construction		0
1-29	Use temporary vegetation, silt barriers, and mulching to protect exposed and critical areas during development including timeline requirements (i.e. two weeks of no activity would need to be seeded)		0
1-30	Redistribute topsoil within the boundaries of the disturbed land for seeding and planting		0
1-31	Stabilize disturbed soils as soon as possible		0
1-32	Minimize the use of cut and fill operations. Conform such operations to topography and soils to minimize erosion potential and adequately accommodate runoff		0
1-33	Use appropriate solid and hazardous waste generation and disposal practices including source controls and recycling		0
1-34	Encourage construction site management techniques which include erosion control practices (follow SWPPPs) and the proper handling and disposal of pesticides and petroleum products and containers		0
1-35	Ensure proper operation and maintenance of runoff management facilities		0
1-36	Target training for contractors, developers, inspectors and zoning and planning officials.		0

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
1-37	Require tree surveys and/or cutting plans.		0
1-38	Develop priority list for BMP's - use of vegetative low areas for retention/infiltration.		0
1-39	Encourage cluster development/conservation subdivisions		0
1-40	Require connection to and/or extension of existing water & sewer if project is within 500 feet of existing infrastructure		0
1-41	Enact limits on driveway grades.		0
1-42	For redevelopment, employ regulations that provide for technologically advanced (on and off) site wastewater treatment systems to optimize efficiencies and address "challenging" sites		0
1-43	Implement Federal/State Stormwater (SPDES) Phase II requirements including MS4 and Construction Permits as well as Municipal and Industrial Discharge Permits	Practice: Construction site and Construction Permit inspection conducted by the county SWCD at the request of NYSDEC; G/FLRPC continues to assist municipalities with other aspects of Phase II Stormwater compliance	2
1-44	Discourage development in flood plain and/or development below base flood elevation	Z.O. Section 301. E - Restrictions to development on lots under water or lots subject to flooding.	2
Section 2: Forestry and Agriculture			
<i>Forestry</i>			
2-01	Consider potential water quality impacts when selecting silviculture system (yarding system, site preparation, pesticides employment, etc)		0
2-02	Consider harvesting practices	Practice: SWCD encourages good woodland management and proper harvesting techniques to maintain present and meet future needs in cooperation with NYSDEC state foresters, and the Genesee County Park and Forest; also, a display at the County Park is being considered that can describe different woodlot management approaches	2
2-03	Seasonal preference for logging operations		0

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
2-04	Have specialists (geologist, soil scientist, geotechnical engineer, wildland hydrologist) review plans in high erosion hazard areas		0
2-05	Preplan harvest areas, skid trails, and access so as to be on stable soils, avoiding steep gradients, multiple stream crossings, poor drainage areas, etc.		0
2-06	Limit grades of access roads.		0
2-07	Require stabilization of roads/drives to forestry site.		0
2-08	Employ natural topography and contour for design of road network		0
2-09	Require stormwater controls for increased runoff from ground cover modification		0
2-10	Consider site restoration		0
<i>Agriculture</i>			
2-11	Use Agricultural Environmental Management (AEM)	Practice: See county SWCD AEM Five Year Plan	2
2-12	Require farms seeking agricultural value assessment to participate in AEM	Does not apply: Legality of such a practice questioned by regional SWCD managers	n/a
2-13	Concentrated Animal Feeding Operations (CAFO) regulations and permits being followed	Practice: See county SWCD AEM Five Year Plan	2
2-14	Use of Comprehensive Nutrient Management Plans	Practice: The latest NYS Ag and Markets Comprehensive Nutrient Planning Grant through the Ag Nonpoint Source Abatement program consists of cost sharing for the development of CNMPs for 18 farms in the Oatka Crekk watershed, 12 in Wyoming County, 5 in Genesee County and 1 in Monroe County	2
2-15	Barnyard runoff controls	Practice: Most recently, Barnyard Runoff Management Systems and other operational BMPs were implemented on farms in Ogden(2), Wheatland(1), LeRoy(3), Pavilion(2), Byron(1), Warsaw(5), Covington(3), Orangeville(1), and Middlebury(1) through the Genesee River Implementatin Grant project	2
2-16	Grazing in environmentally sensitive areas (e.g. streams)	Practice: Caring for Creeks, EPF Ag NPS Abatement grants	2

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
2-17	Use of agricultural protection such as Agricultural Districts, agricultural preservation ordinances and practices, right to farm laws, and Agricultural and Farmland Protection Plans	Z.O. Section 312 - Agricultural Districts are designed to preserve the Towns agricultural base and maintain its rural nature. County Agricultural and Farmland Protection Plan under production.	2
2-18	Existing Open Space Plans	Genesee County Smart Growth Plan, 2005 Review Report, page 7: Purpose of the plan is to minimize the impacts from additional growth and development that would otherwise occur as a result of the extension of water service.	2
Section 3: Waterways and Wetlands			
<i>Modified Waterways</i>			
3-01	Develop an operation and maintenance program for existing modified streams that includes identification of opportunities and actions to restore habitat and the physical and chemical characteristics of these streams.		0
3-02	Improve stream quality by controlling instream sedimentation and selectively clearing debris	Practice: SWCD	2
3-03	Establish or reestablish riparian buffers	Practice: SWCD works in conjunction with land owners, farmers in particular, implementing federally-funded programs	2
3-04	Prevent animal wastes from entering waterbodies. Examples may include: animal control ordinances and/or practices that pertain to animal waste disposal; waterfowl abatement programs.	Section 630, Stabling of Farm Animals 3: Disposal of bedding, manure or other animal waste shall be in conformance with guidelines established by the US Soil Conservation Service and/or Genesee County Soil and Water Conservation District. The ZEO may require an individual who stables farm animals to provide the Town with an animal waste disposal plan approved by one of the aforementioned agencies. See also Sec. 670 Animal Waste Storage Facilities [refers to Sec. 630 above].	2
3-05	Attempt vegetative stabilization before undertaking structural measures	Practice: SWCD has used vegetated systems, such as downed trees and logs, to stabilize severely eroded banks	2
3-06	Schedule the periodic maintenance of sediment control measures, and inspect and repair them as needed in conformance with established schedule.	Practice: SWCD is always looking for opportunities to devise check dams; maintains several that are in operation	2

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
3-07	Protect streambanks through direct nonstructural means, such as new vegetation or protection of existing vegetation; direct structural means, such as revetments and bulkheads; indirect nonstructural means, such as regulating irrigation near streambanks or rerouting overbank drainage; or indirect structural means, such as deflecting channel flow away from streambanks with dikes, board fences and gabions	Practice: also SWCD has used vegetated systems, such as downed trees and logs, to stabilize severely eroded banks	2
3-08	Use setbacks to minimize disturbance of land adjacent to streambanks and shorelines		0
3-09	Prevent discharges to waterbodies in amounts that would adversely affect the taste, color or odor of the waters, or would impair the waters for their best usages		0
<i>Wetlands and Riparian Area Management and Restoration</i>			
3-10	Consider wetlands and riparian areas and their non-point source (nps) control potential	Practice: guiding principle of SWCD operations, as exemplified in efforts in the field (Wetland Reserve Program) as well as education and outreach programs	2
3-11	Identify existing functions of those wetland and riparian areas with significant nps control potential when implementing nps management practices. Do not alter wetlands or riparian areas to improve their water quality at the expense of their other functions		0
3-12	Conduct permitting, licensing, certification and nonregulatory nps pollution activities in a manner that protects wetland functions		0
3-13	Special zoning considerations to protect wetland areas		0

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
3-14	Use appropriate pretreatment practices such as vegetated systems or detention or retention basins to prevent adverse impacts to wetland functions that affect nps pollution abatement from hydrologic changes, sedimentation, or contaminants		0
3-15	All projects should require wetlands certification.		0
Section 4: Recreation			
<i>Docks and Launches</i>			
4-01	Required site planning and approval for docks and launches		0
4-02	Use of naturally resistant non-treated wood for docks		0
4-03	Docks constructed to allow for free-flow of water beneath them to prevent erosion and sedimentation along shoreline		0
4-04	Limit size of docks		0
4-05	Maintenance of dock - application of preservatives and paints		0
4-06	Consideration of access to dock and launches to mitigate erosion		0
<i>Golf Courses</i>			
4-07	Pesticide storage - covered, locked concrete or steel building with adequate ventilation and metal shelving, no floor drains, and berm or sill to contain spills		0
4-08	Pesticide mixing and loading - use of chemical mixing center and proper operation and maintenance		0
4-09	Solvents and Degreasers - separate solvent collection systems such as solvent wash baths		0
4-10	Solvents and Degreasers - consideration of storage, use (contained), and disposal		0

Town of Stafford
Black and Oatka Watersheds

<i>BMP #</i>	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
4-11	Fertilizer Storage - covered fertilizer storage areas with curbs or berms to prevent water from entering. Secondary containment should be used even where not required		0
4-12	Fertilizer Loading: Make specific accommodations for fertilizer loading and mixing so that spills may be collected and managed. Examples include covered, impermeable surfaces intended for mixing; sloped surfaces that direct spills toward a liquid-tight sump for recovery; provision of appropriate cleaning materials, such as cat litter or sand.		0
4-13	Disposal of grass clippings: Grass clippings should remain on the surface in order to provide a natural source of organic matter and nutrients. If this is not preferred, clippings should be spread lightly in the rough or other unmanaged areas away from surface waters, outside of aquatic buffer zones.		0
4-14	Used Oil, antifreeze and lead acid batteries - collection and recycling		0
4-15	Gasoline, Diesel fuel - compliance with DEC regulations for above-ground and below ground tanks, closing of stormwater drains in immediate vicinity of fueling point		0
4-16	General Equipment Washing: Minimize the use of detergents or degreasers; high pressure systems are used to decrease water usage; If less than 500 gallons per day, wastewater from equipment washing may drain to a grassed retention area or swale away from receiving waterbodies; otherwise discharges should be directed to a municipal treatment system		0
4-17	Encourage use of vegetated buffers near aquatic areas, such as streams, ponds, lakes and wetlands		0

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
Section 5: Roads and Bridges			
<i>Existing Roads and Bridges</i>			
5-01	Conduct road and bridge maintenance (de-icing material usage and storage, pot-hole repair, bridge washing, scraping and painting, etc) according to best management practices	Practice: basic BMPs are being practiced by the department; road salt storage enclosed, site stabilization, etc	2
5-02	Conduct right-of-way activities (mowing, brush removal, pesticide and fertilizer use, etc) - according to best management practices	Practice: when right of way activities disturb large areas, no chemicals are used and hand seeding takes place after; the department attempts to retain as much vegetation as possible	2
5-03	Include high percentage of indigenous plants in new landscaping on public-owned properties (excluding arboretums, horticultural gardens, and site requiring turf grasses)	Practice: department rarely does planting; however, large planting effort underway near the department; disease resistant species are a high-priority	2
5-04	Implement a regular inspection and maintenance plan of existing structures	Practice: culverts are the only structures (besides bridges); department recently began a detailed visual inspection of such facilities	1
5-05	Develop and identify erosion/sediment control areas (examples include steep slopes, easily erodible soils, and nearby sensitive areas) and retrofit opportunities		0
5-06	Incorporate alternatives to traditional de-icing practices, including adjusting mix rates, using non-salt and non-sand alternatives	Practice: alternatives are going to be tested as soon as it is financially feasible	1
<i>New Roads and Bridges (Road Rehabilitation Only)</i>			
5-07	Minimize the amount of land disturbed and the duration of disturbance	Practice	2
5-08	Preserve natural features and conform substantially with the natural boundaries and alignment of waterbodies	Z.O. Section 690. J - Existing on-site vegetation shall be preserved to the maximum extent possible and no cutting of trees exceeding 4 inches in diameter. <i>[RE: Communication Towers]</i>	2
5-09	Retain and protect trees and other natural vegetation on and near disturbed sites	Z.O. Section 690. J - Existing on-site vegetation shall be preserved to the maximum extent possible and no cutting of trees exceeding 4 inches in diameter. <i>[RE: Communication Towers]</i>	2
5-10	Retain additional runoff sites		0
5-11	Minimize the creation of impervious areas		0

Town of Stafford
Black and Oatka Watersheds

BMP #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
5-12	Treat increased runoff caused by changed surface conditions to minimize the danger of flooding, erosion and pollutants entering waterbodies prior to, during and after construction		0
5-13	Use temporary vegetation and mulching to protect exposed and critical areas during development	Practice	2
5-14	Redistribute topsoil within the boundaries of the disturbed land for seeding and planting	Practice	2
5-15	Stabilize disturbed soils as soon as possible	Practice	2
5-16	Minimize the use of cut and fill operations. Conform such operations to topography and soils to minimize erosion potential and adequately accommodate runoff	Practice	2
5-17	Control erosion and sedimentation prior to, during and after site preparation and construction		0
5-18	Require long term stormwater management plan.		0
5-19	Require long term sedimentation control & maintenance.	Practice: Stormwater Phase II Pre/Post Regulations are required; SWCD will inspect implementation at the request of the DEC or constituent municipalities	1
<i>All Roads and Bridges</i>			
5-20	Target existing public holdings, such as parks, for removing unnecessary impervious surfaces		0
5-21	Incorporate New York State Department of Transportation design and guidance documents, standard specifications, and procedural manuals (<i>Highway Design Manual, Environmental Procedures Manual, Maintenance Guidelines, etc</i>) into local laws and operating procedures		0
5-22	Ensure application of appropriate solid and hazardous waste generation and disposal practices including source controls and recycling	Practice	2

Town of Stafford
Black and Oatka Watersheds

<i>BMP #</i>	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
5-23	Ensure proper operation and maintenance of runoff management facilities	Practice: few such facilities present within the department, but they are looked after as necessary	2
5-24	Participate in Cornell Local Roads Program activities and training	Practice: attends regularly	2
5-25	Target training programs at highway officials, contractors, construction workers, inspectors, zoning and planning officials		0
5-26	Target training and outreach programs about the proper handling of materials, leakage and spill prevention and spill response procedures at maintenance staff and workers	Practice: covered through mandatory OSHA training	2
5-27	Culvert maintenance: Culverts are routinely inspected and maintained so that they will remain unobstructed, allowing for the free flow of water during storm events. Blockages resulting from sedimentation, debris, excessive vegetation and structural failure are issues to be aware of.	Practice: department has recently begun a detailed visual inspection program for such facilities	2
5-28	Culvert sizing for existing land use	Practice: problem culverts have been identified; no significant repairs have been scheduled, however	1
5-29	Culvert sizing for changes in upstream land use and imperviousness		0
Section 6: Onsite Wastewater Treatment Systems			
6-01	Conduct regular inspections of OWTS at a frequency adequate to determine failure and undertake required maintenance		0
6-02	Institute setback guidelines		0
6-03	Promulgate plumbing codes that require practices that are compatible with OWTS		0
6-04	Target outreach programs at homeowners, contractors and developers	Practice: Genesee County DOH, CCE, SWCD all offer various education and outreach materials and programs	2
6-05	Inspection of all OWTS at property transfer or within 1 year prior to transfer	Genesee County Sanitary Code: inspections performed when repairs, expansions or alterations take place; inspections performed when property transfers take place or upon request during refinancing	2

Town of Stafford
Black and Oatka Watersheds

<i>BMP</i> #	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Implementation
			2-full, 1-partial, 0-not at all, n/a-not applicable
6-06	Require all properties within 500' of municipal service to connect.		0
6-07	Set goals for effluent limits (nitrogen, phosphorous, BOD, etc)		0
