

**Town of Seneca Falls**  
Cayuga Lake Watershed

	Best Management Practices (BMP)	Existing Means of Implementation (law, regulation, practice, etc)	Degree of Implementation
			(2-fully, 1-partially, 0-not at all, n/a-not applicable)
1-01	Identify retrofit opportunities		0
1-02	Identify habitat and natural conveyance system restoration opportunities		0
1-03	Establish retention/detention areas		0
1-04	Acquire additional land for locating treatment facilities		0
1-05	Encourage homeowners to place compost piles away from waterbodies and roadways		0
1-06	Encourage proper use and disposal of lawn and other household chemicals	<b>Practice:</b> Seneca County Household Hazardous Waste program, funded through the EPF	2
1-07	Institute turf management practices on golf courses and parks and recreation areas		0
1-08	Undertake storm drain stenciling	<b>Practice:</b> Cayuga Lake Watershed Network, Cayuga Lake Watershed Intermunicipal Organization	2
1-09	Encourage volunteer programs, such as adopt-a-highways and adopt-a-stream, etc.	<b>Practice:</b> Cayuga Lake Watershed Network, Cayuga Lake Watershed Intermunicipal Organization, Friends of Fall Creek, Friends of Six Mile Creek, Six Mile Creek Monitoring, Cayuga Lake Defense Fund and SLAP-5 all active	2
1-10	Include high percentage of indigenous plants in new landscaping on privately-owned properties (excluding arboretums, horticultural gardens, and sites requiring turf grasses)		0
1-11	Encourage water conservation		0
1-12	Develop outreach programs targeted at specific problems related to water quality management & resource conservation	<b>Practice:</b> FL/LOWPA, the Finger Lakes Institute, county SWCD, Cornell Cooperative Extension and local watershed groups each develop programs	2
1-13	Encourage proper control of pet wastes		0
1-14	Encourage continued operation of private storm water runoff control structures		0
1-15	Discourage feeding of waterfowl		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

1-16	Discourage the introduction of exotic aquatic species (Eurasian water milfoil, zebra mussels, water chestnut, etc	<b>Practice:</b> Finger Lakes Institute "Weeds Watch Out" program, as well as other initiatives by CCE, SWCD, and other local watershed groups	2
1-17	Encourage continued (periodic) operation and maintenance of private septic disposal systems	<b>Practice:</b> SLAP-5 has conducted extensive education and outreach throughout the Finger Lakes region regarding proper operation and maintenance of septic systems, along with county CCE's, SWCD's and other pertinent groups	2
1-18	Effective and consistent application and enforcement of stormwater regulations & requirements		0
1-19	Require certification of existing on site septic systems for property transfers or building expansions.		0
1-20	Require entire property (existing as well as proposed) to be included in stormwater analysis/calculation.		0
1-21	Minimize the amount of land disturbed and the duration of disturbance	<b>Zoning Ordinance Sec 103-29(A):</b> Within a year after beginning the excavation of a building has begun, the owner shall have it covered or filled to normal grade... <b>(B)</b> If, after 30 days' notice by the Zoning Officer, the owner fails to cover or fill such excavation, the Town Board may order this work to be done and shall charge the property owner any costs incurred	1
1-22	Preserve natural features and conform substantially with the natural boundaries and alignment of waterbodies	<b>Comprehensive Plan, Recreation Recommendation #7:</b> Protect and preserve natural drainage features in the town and village to provide natural outlets for wet weather and seasonal flow, to eliminate possible pollution of these streams...	1
1-23	Retain and protect trees and other natural vegetation on and near disturbed sites	<b>Subdivision Ordinance: Act. IV Sec 86-26, "Preservation of natural features:"</b> The Planning Board shall, wherever possible, establish the preservation of all natural features which add value to residential developments and to the community, such as large trees or groves...	2
1-24	Account for topography and soil type in efforts to minimize erosion potential		0
1-25	Maintain runoff rates similar to pre-construction levels		0
1-26	Minimize the creation of impervious areas		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

1-27	Control increased runoff caused by changed surface conditions to minimize the danger of flooding, erosion, sedimentation and pollutants entering waterbodies prior to, during and after construction		0
1-28	Use temporary vegetation and mulching to protect exposed and critical areas during development		0
1-29	Redistribute topsoil within the boundaries of the disturbed land for seeding and planting	<b>Zoning Ordinance Sec 103-28:</b> No person or business shall strip, excavate or otherwise remove topsoil for sale or for use other than on the premises from which taken until the Town Board has approved a plan for landscaping and proper drainage and issued a permit to implement the same	2
1-30	Stabilize disturbed soils as soon as possible	<b>Zoning Ordinance Sec 103-29(A):</b> Within a year after beginning the excavation of a building has begun, the owner shall have it covered or filled to normal grade...	2
1-31	Minimize the use of cut and fill operations. Conform such operations to topography and soils to minimize erosion potential and adequately accommodate runoff		0
1-32	Use appropriate solid and hazardous waste generation and disposal practices including source controls and recycling		0
1-33	Encourage construction site management techniques which include the proper handling and disposal of pesticides and petroleum products and containers		0
1-34	Ensure proper operation and maintenance of runoff management facilities		0
1-35	Target training for contractors, inspectors and zoning and planning officials.	<b>Practice:</b> staff attend training on occasion	2
1-36	Require tree surveys and/or cutting plans.		0
1-37	Develop priority list for BMP's - use of vegetative low areas for retention/infiltration.		0
1-38	Encourage cluster development.		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

1-39	Require connection to and/or extension of existing water & sewer if project is within 500 feet of existing infrastructure	<b>Town Code, Ch. 73 Sec 73-3(A):</b> The owners of all houses, buildings or properties...is hereby required...to install facilities connecting directly with the proper public sewer...within three hundred feet...	2
1-40	Enact limits on driveway grades.	<b>Subdivision Regulations, Sec 86-22(D):</b> ...Driveway grades between the street and the setback line shall not exceed 10%	2
1-41	For redevelopment, employ regulations that provide for technologically advanced (on and off) site wastewater treatment systems to optimize efficiencies and address "challenging" sites		0
1-42	Implement Federal/State Stormwater (SPDES) Phase II requirements	<b>Practice:</b> rules for Pre/Post Construction facilitated by county SWCD and the regional planning council	2
2-01	Consider potential water quality impacts when selecting silviculture system (yarding system, site preparation, pesticides employment, etc)		0
2-02	Consider harvesting practices		0
2-03	Seasonal preference for logging operations		0
2-04	Have specialists (geologist, soil scientist, geotechnical engineer, wildland hydrologist) review plans in high erosion hazard areas		0
2-05	Preplan harvest areas, skid trails, and access so as to be on stable soils, avoiding steep gradients, multiple stream crossings, poor drainage areas, etc.		0
2-06	Limit grades of access roads.		0
2-07	Require stabilization of roads/drives to forestry site.		0
2-08	Employ natural topography and contour for design of road network		0
2-09	Require stormwater controls for increased runoff from ground cover modification		0
2-10	Consider site restoration		0
2-11	Use Agricultural Environmental Management (AEM)	<b>Practice:</b> Active and administered by county SWCD; projects are prioritized each year based on local needs and EPF funding	2
2-12	Require farms seeking agricultural value assessment to participate in AEM		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

3-01	Develop an operation and maintenance program for existing modified streams that includes identification of opportunities and actions to restore habitat and the physical and chemical characteristics of these streams.		0
3-02	Improve stream quality by controlling instream sedimentation and selectively clearing debris		0
3-03	Establish or reestablish riparian buffers	<b>Zoning Ordinance Sec 103-30:</b> In all districts, no permanent structures shall be permitted within 50 ft of the edge of the bank of any streams or existing natural drainage channel	2
3-04	Prevent animal wastes from entering waterbodies		0
3-05	Attempt vegetative stabilization before undertaking structural measures		0
3-06	Design and construct shore erosion control facilities, in accordance with an erosion and sedimentation control plan, in areas where marsh creation and soil bioengineering are ineffective or where existing protection methods are being flanked or are falling		0
3-07	Schedule the periodic maintenance of sediment control measures, and inspect and repair them as needed in conformance with established schedule.		0
3-08	Protect streambanks through direct nonstructural means, such as new vegetation or protection of existing vegetation; direct structural means, such as revetments and bulkheads; indirect nonstructural means, such as regulating irrigation near streambanks or rerouting overbank drainage; or indirect structural means, such as deflecting channel flow away from streambanks with dikes, board fences and gabions		0
3-09	Use setbacks to minimize disturbance of land adjacent to streambanks and shorelines		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

3-10	Prevent discharges to waterbodies in amounts that would adversely affect the taste, color or odor of the waters, or would impair the waters for their best usages	<b>Local Code, Ch. 23, Article II(B):</b> It shall be unlawful to discharge to any natural outlet within the Town of Seneca Falls or in any area under the jurisdiction of said town any wastewater or other polluted water...	2
3-11	Consider wetlands and riparian areas and their non-point source (nps) control potential on a watershed scale		0
3-12	Identify existing functions of those wetland and riparian areas with significant nps control potential when implementing nps management practices. Do not alter wetlands or riparian areas to improve their water quality at the expense of their other functions		0
3-13	Conduct permitting, licensing, certification and nonregulatory nps pollution activities in a manner that protects wetland functions		0
3-14	Special zoning considerations to protect wetland areas	<b>Zoning Ordinance, Sec 103-20(D): Special Uses</b>	2
3-15	Use appropriate pretreatment practices such as vegetated systems or detention or retention basins to prevent adverse impacts to wetland functions that affect nps pollution abatement from hydrologic changes, sedimentation, or contaminants		0
3-16	All projects should require wetlands certification.		0
4-01	Clean maintenance areas regularly preferably by vacuuming to remove trash, sandings, paint chips, etc.		0
4-02	Prevent residue from being carried into surface waters by performing abrasive blasting within plastic tarp enclosures on windless days or within spray booths		0
4-03	Provide proper disposal/recycling facilities to marina patrons, preferably covered receptacles		0
4-04	Establish fish cleaning areas, and implement rules governing the conduct of fish cleaning operations		0
4-05	Educate boaters on the importance of proper fish cleaning practices		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

4-06	Implement fish composting where appropriate		0
4-07	Store materials in areas impervious to the type of material stored. Build curbs, berms, or other barriers around the areas to contain spills		0
4-08	Use separate, clearly labeled containers for the disposal of oil, gasoline, antifreeze, diesel, kerosene, and mineral spirits		0
4-09	Target outreach programs about proper disposal at marina patrons through the use of signs, mailings, and other means		0
4-10	Promote the use in bilges of oil-absorbing materials, and replace them as necessary, preferably recycling, or disposing of them in accordance with petroleum disposal regulation		0
4-11	Use a container under the air vent while refueling inboard tanks if the tank vents are not equipped with a fuel/air separator		0
4-12	Prohibit in-water hull scraping or any underwater process to remove paint from boat hulls		0
4-13	Wash the boat hull above the waterline by hand, using only necessary amounts of detergents and cleaning compounds that are phosphate-free and biodegradable		0
4-14	Prohibit the use of detergents and cleaning compounds containing ammonia, sodium hypochloride, chlorinated solvents, petroleum distillates, alcohol, or lye		0
4-15	Educate individuals about the importance of trash reduction and recycling through: interpretive and instructional signs placed at marinas and boat-launching sites, pamphlets or flyers, newsletters, inserts in billings, meetings and presentations, workshops, and certification programs		0
4-16	Inspect pumpout facilities regularly, and repair them, if practical, under a maintenance contract with a competent contractor		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

4-17	Add language to slip lease agreements mandating the use of pumpout facilities and specifying penalties for failure to comply		0
4-18	Place dye tablets in holding tanks to identify and discourage illegal disposal		0
4-19	Prohibit motorized vessels from areas (define areas) that contain important shallow-water habitats		0
4-20	Establish and enforce no-wake zones to decrease turbidity and reduce erosion potential from boat wakes		0
4-21	Design and site marinas to maximize exchange of marina basin water. Limit basins and channels with square corners that tend to trap flotsam, and place dock structures in a manner that promotes circulation		0
4-22	Perform a preconstruction assessment, which includes a water quality monitoring and modeling methodology, to predict post-construction water quality conditions		0
4-23	Monitor water quality during construction to protect ambient water quality to the maximum practicable extent		0
4-24	Develop a marina siting policy to discourage development in areas containing important habitat designated by local, State, or federal agencies		0
4-25	Conduct surveys and employ rapid bioassessment techniques to assess historic habitat function (e.g. spawning, nursery, and migration pathways) and potential impacts to these and other biological functions and resources		0
4-26	Encourage the redevelopment or expansion of existing marina facilities that have demonstrated minimal environmental impacts instead of developing new marina facilities		0
4-27	Consider alternative sites with minimal potential environmental impacts when the use of previously disturbed sites is not feasible		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

4-28	Minimize disturbance of indigenous vegetation in the riparian area		0
4-29	Use soil bioengineering or plants, wherever conditions allow, to restore damaged habitat along shorelines and streambanks		0
4-30	Use properly designed and constructed engineering practices that minimize shoreline disturbance in areas where soil bioengineering and plants are ineffective		0
4-31	Use appropriate shore erosion control methods, such as returns or return walls, in areas where existing protection methods are being flanked or are falling		0
4-32	Plan and design all steambank, shoreline, and navigation structures so that they do not transfer erosion energy to or otherwise cause visible loss of surrounding streambanks or shorelines		0
4-33	Locate and design fuel stations so that spills can be contained in a limited area		0
4-34	Design and install underground fuel storage tanks according to State regulations, including the provision of detection systems and automatic fuel tank and pump leak shut-offs		0
4-35	Provide aboveground fuel tanks and fueling areas with a curbed or diked storage area to handle containment volumes meeting State (and local) codes and inspect regularly		0
4-36	Use preferred pumpout systems: fixed-point, portable, dedicated slipside, and pumpout boats		0
4-37	Design onsite wastewater treatment systems to specifically handle waste from vessels		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

4-38	Post pumpout facility location and regulations at the marina. Charge fees that encourage rather than discourage facility use. Consider offsetting the cost of maintaining pumpout facilities by fuel sales where these facilities are conveniently located in close proximity to one another		0
4-39	Restrict boat repair and maintenance activities to clearly marked designated areas to prevent debris from falling into the water and preventing invasive species		0
4-40	Secure all fueling facilities and storage areas with appropriate shut-off devices and security locks and inspect regularly		0
4-41	Design fueling stations with spill containment equipment that is stored in a clearly marked location, accessible to work and storage areas. Post emergency phone numbers in a prominent location		0
4-42	Design a spill contingency plan		0
4-43	Inspect and maintain all containment berms or devices in accordance with State regulations. Investigate immediately signs of leakage or spillage, and undertake cleanup in accordance with applicable best management practices		0
4-44	Have a trained operator present and prepared to respond to accidental spills		0
4-45	Maintain daily inventory records to identify abnormal loss or gain of liquid		0
4-46	Prohibit the cleaning of hoses, fittings, pumps, and other accessory equipment on piers, docks or adjacent upland to prevent runoff into the marina basin or other surface or groundwater		0
4-47	Create and/or maintain a dedicated fund for maintenance in the case of government-owned facilities		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

4-48	Restrict the operation of pumpout facilities to trained marina personnel only		0
5-01	Conduct road and bridge maintenance (de-icing material usage and storage, pot-hole repair, bridge washing, scraping and painting, etc) according to best management practices	<b>Practice:</b> salt storage is contained; basic BMPs used throughout the town as needed	1
5-02	Conduct right-of-way activities (mowing, brush removal, pesticide and fertilizer use, etc) - according to best management practices	<b>Practice:</b> no chemicals are used; seasonal conditions are taken into consideration; vegetation retained on steep slopes	2
5-03	Include high percentage of indigenous plants in new landscaping on public-owned properties (excluding arboretums, horticultural gardens, and site requiring turf grasses)		0
5-04	Implement a regular inspection and maintenance plan of existing structures	<b>Practice:</b> inspections occur after farms have completed major tilling of land in order to clear debris; regular visual inspections occur otherwise	2
5-05	Develop and identify erosion/sediment control areas (examples include steep slopes, easily erodible soils, and nearby sensitive areas) and retrofit opportunities		0
5-06	Require percentage of roads to be tested with non-ice and non-sand de-icing.		0
5-07	Minimize the amount of land disturbed and the duration of disturbance	<b>Practice:</b> General operating procedure	2
5-08	Preserve natural features and conform substantially with the natural boundaries and alignment of waterbodies	<b>Comprehensive Plan, Recreation Recommendation #7:</b> Protect and preserve natural drainage features in the town and village to provide natural outlets for wet weather and seasonal flow, to eliminate possible pollution of these streams...	1
5-09	Retain and protect trees and other natural vegetation on and near disturbed sites	<b>Subdivision Ordinance: Act. IV Sec 86-26, "Preservation of natural features:"</b> The Planning Board shall, wherever possible, establish the preservation of all natural features which add value to residential developments and to the community, such as large trees or groves...	2
5-10	Retain additional runoff sites		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

5-11	Minimize the creation of impervious areas		0
5-12	Treat increased runoff caused by changed surface conditions to minimize the danger of flooding, erosion and pollutants entering waterbodies prior to, during and after construction	<b>Practice:</b> basic methods such as silt fencing and geotextiles are used when necessary	2
5-13	Use temporary vegetation and mulching to protect exposed and critical areas during development	<b>Practice:</b> hydroseeding is commonly used	2
5-14	Redistribute topsoil within the boundaries of the disturbed land for seeding and planting	<b>Zoning Ordinance Sec 103-28:</b> No person or business shall strip, excavate or otherwise remove topsoil for sale or for use other than on the premises from which taken until the Town Board has approved a plan for landscaping and proper drainage and issued a permit to implement the same	2
5-15	Stabilize disturbed soils as soon as possible	<b>Zoning Ordinance Sec 103-29(A):</b> Within a year after beginning the excavation of a building has begun, the owner shall have it covered or filled to normal grade...	1
5-16	Minimize the use of cut and fill operations. Conform such operations to topography and soils to minimize erosion potential and adequately accommodate runoff		0
5-17	Control erosion and sedimentation prior to, during and after site preparation and construction	<b>Practice:</b> basic methods for control are used	2
5-18	Require long term stormwater management plan.	<b>Practice:</b> General operating procedure	2
5-19	Require long term sedimentation control & maintenance.		0
5-20	Target existing public holdings, such as parks, for removing unnecessary impervious surfaces		0
5-21	Incorporate New York State Department of Transportation design and guidance documents, standard specifications, and procedural manuals ( <i>Highway Design Manual, Environmental Procedures Manual, Maintenance Guidelines</i> , etc) into local laws and operating procedures		0

**Town of Seneca Falls**  
Cayuga Lake Watershed

5-22	Ensure application of appropriate solid and hazardous waste generation and disposal practices including source controls and recycling	<b>Practice:</b> basic controls are in place	1
5-23	Ensure proper operation and maintenance of runoff management facilities	<b>Practice:</b> for example, inlets and outlets of culverts are routinely checked and cleared	2
5-24	Participate in Cornell Local Roads Program activities and training	<b>Practice:</b> supervisor attends	2
5-25	Target training programs at highway officials, contractors, construction workers, inspectors, zoning and planning officials	<b>Practice:</b> staff attend training on occasion	2
5-26	Target training and outreach programs about the proper handling of materials, leakage and spill prevention and spill response procedures at maintenance staff and workers	<b>Practice:</b> basic workplace safety training (OSHA)	2
6-01	Conduct regular inspections of OWTS at a frequency adequate to determine failure and undertake required maintenance		0
6-02	Institute setback guidelines		0
6-03	Promulgate plumbing codes that require practices that are compatible with OWTS		0
6-04	Target outreach programs at homeowners, contractors and developers	<b>Practice:</b> Cornell Cooperative Extension, Soil and Water Conservation District, Cayuga Lake Network, Cayuga Lake I/O all conduct education and outreach programs	2
6-05	Inspection of all OWTS at property transfer or within 1 year prior to transfer		0
6-06	Require all properties within 500' of municipal service to connect.	<b>Town Code, Ch. 73 Sec 73-3(A):</b> The owners of all houses, buildings or properties...is hereby required...to install facilities connecting directly with the proper public sewer...within three hundred feet...	2
6-07	Set goals for effluent limits (nitrogen, phosphorous, BOD, etc)		0
