

# **2011 Road Deicing & Storage Inventory Update**

## **Methodology**

The survey contact database used to conduct the inventory was from the database previously created during the completion of the G-FL Region Road Deicing & Storage Inventory in 2004. The survey contact database was updated as needed while simultaneously conducting the survey with each individual contact. The survey was conducted entirely via telephone with all questions read completely and accurately to each contact. Some contacts required several calls before having the survey completed. The database previously created for this project included considerations for all roads that a municipality, county or Department of Transportation conducted any deicing application. Those roads include any state, federal, county, and municipal roads. The contacts included the New York State Department of Transportation Regions 3, 4, and 6, all county highway departments as well as all municipal highway superintendents, administrators, and public works supervisors. For the Genesee-Finger Lakes Region this amounted to 205 contacts. The survey was comprised of a total of 12 questions. All data received from the contacts was then tabulated in an Excel spreadsheet with quality review conducted of all data entered.

A 100.0% response rate was achieved, totaling 205 questionnaires.

ID	County	Municipality/Agency	Use Deicing Material	Contract	Type of Material	Type (Other)	Multiple Types	Ratio	Mix Own Material	Policy
1	Genesee	Town of Alabama	Y	N	Salt & Ice Ban	N/A	Y	1 ton salt/ 8gal ice ban	N	Temperature, Road Conditions, Experience
2	Genesee	Town of Alexander	Y	N	Salt & Sand	N/A	Y	80% salt/ 20% sand	Y	Visual inspections, road temperature, icy conditions
