

CHAPTER 6. LIMNOLOGY AND WATER QUALITY

ACKNOWLEDGEMENTS

Many thanks must be extended to the numerous people and organizations that made the collection of this data possible. Our apologies in advance if you do not see your name or organization within this list. First and foremost, thanks to the numerous undergraduates that spent countless hours on the Explorer and in the lab deciphering complicated procedures during courses and independent study endeavors (see below). Special thanks are extended to Captain John Nichols and Mate John Abbott who operate the HWS Explorer, Barb Halfman who kept the lab organized and stocked with supplies, and “Buzz” De Felice who allowed the collection of Kashong Bay water samples from his dock. Seneca Lake Pure Waters Association (SLPWA) and Seneca Lake Area Partners in Five Counties (SLAP-5) provided a strong motive to continue the limnological monitoring program. Finally, Hobart and William Smith Colleges and its Department of Geoscience made it possible with substantial financial and logistical support.

The list of students include: David Cohn (H'95), Mary Gibbons-Neff (WS'97), Keri Lesniak (WS'97), Andrea Pulver (WS'97), Jennifer McKnight (WS'97), Damian Herrick (H'97), Ethan Prout (H'97), Andrew Babaian (H'97), Theron Bond (H'97), Matthew Lamana (H'97), Matthew Nuzzo (H'97), John Fiori (H'97), Kathleen Maloney (WS'98), Robert Dedrick (H'98), Thomas Sardella (H'98), David Went (H'98), Jason Christensen (H'98), Jason Farnung (H'98), Nathan Kranes (H'98), Kathryn Hammontree (WS'99), Megan LeBoutillier (WS'99), Kevin Farr (H'99), Andrew Dominick (H'99), Miki Alroy (H'99), John Vandemoer (H'00), Arthur Discoll (H'00), Micah Nicolo (H'01), Timothy Riley (H'01), Derith Hart (WS'01), Jon Rumpf (H'00), Mary Beth Giancarlo (WS'00), and Sandy Baldwin (WS'01). Nadine Acquisto (WS'95) was the first HWS student to investigate the impact of zebra mussels in Seneca Lake in a serious way (Acquisto, 1995).
